

# CSCA20 - Lab -1

**I just want to get my core competencies**

## **Learning Objectives**

Look... we get it... things haven't gone as you planned this term. You set out with lofty goals of getting 100% in the course, but now the end of the semester is on the horizon, and you're missing core competencies you need to pass the course. Yes, you can demonstrate those competencies in the exam, but that's scary... if things go wrong there's no do-over... and lab 8 is just as scary if you don't have the core competencies yet. So this is your escape valve... just simple core competency demonstrations to take failure off the table.

## **Demonstration & Evaluation**

In this lab, you will be given the opportunity to demonstrate all core competencies.

## **The Scenario**
